

# A Walk with Ferdi

A gentle science adventure through observation and story

No tests. No timers. Just curiosity.

Name: \_\_\_\_\_

Date: \_\_\_\_\_

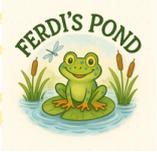

Today, you're joining Ferdi the frog for a quiet walk near the water. Ferdi loves to notice small things. He listens, watches, and wonders. As you explore, pretend Ferdi is hopping beside you, asking questions and helping you look a little closer at the natural world.

Where are you exploring today? (You can write or draw.)

- Backyard    Park    Pond or stream    Garden    Somewhere else

# A Walk with Ferdi

Ferdi says: "Slow down. Nature doesn't rush."

What do you see? Draw or write about one thing that catches your eye.

Is it moving or still? Is it big or tiny? What colors do you notice?

Ferdi says: "Close your eyes for a moment." What sounds do you hear?  
Circle or add your own.

Birds

wind

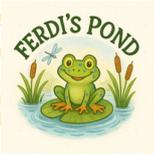

water

Insects

Leaves

Quiet

# A Walk with Ferdi

Ferdi says: "Slow down. Nature doesn't rush."

What do you see? Draw or write about one thing that catches your eye.

Choose one question to explore:

- Why do you think this place looks the way it does?
- What might live here when you're not watching?
- How does this place change when it rains?
- What would you ask this place if it could talk?

Write or draw your thoughts below.

# A Walk with Ferdi

Ferdi says: "When we understand nature, we learn how to care for it."

One small way I can care for nature today:

- Pick up litter
- Be gentle with plants
- Watch without touching
- Save water
- Share what I learned
- Other: \_\_\_\_\_

"Science begins with noticing. Thank you for noticing today."

~ Ferdi
